

Gas Geyser | ThermoFlow 5800

Specification

Power: 2000W

Capacity: 25 Litres

Voltage : 230V ~ 50Hz

Inner Tank: 100% Stainless Steel Water Tank

World's No. 1 Italy Brand Thermowatt Heating Element

Net Weight: 6.5 Kg

Gross Weight: 08 Kg

Mounting: Vertical

Automatic IC Ignition System

Water Pressure: Min 0.01 Mpa Max 0.0 Mpa

Safety Device: Over Heating Safety Device Installed

Packing Dimension: L502 x W378 x H384 mm

Warranty: Lifetime warranty of Stainless Steel Water Tank

How to Connect

- **Safety First:** Always prioritize safety by turning off water, electricity, or gas supplies, and carefully reading the manufacturer's manual before starting.
- **Secure Mounting & Connections:** Mount the geyser securely to a structurally sound surface, then meticulously connect water lines (cold inlet, hot outlet) and the crucial pressure relief valve.
- **Utility Specific Hook-ups:** For electric, connect power supply to the designated terminals; for gas, securely connect the gas line and ensure proper ventilation/flue installation.
- **Test & Verify:** After all connections, slowly fill the tank (if applicable), check for leaks, and then carefully activate the power or gas to test for proper heating and operation.
